Block 1 (online): September 15-17, 2021

The first three days of online meetings will be devoted to getting to know each other by students and tutors (workshop, self-presentations). In addition, students will be introduced to the basic knowledge of climate change and its complexity in the context of the functioning of the local systems.

Block 2 (place-based, in Warsaw): September 20-24, 2021

During their stay in Warsaw, students will work in international teams on the problem of climate change perceived in the perspective of the university campus. Each team will receive a different problem area. Work in teams will be supervised and supported by tutors. Each team will be assigned tutors. Additionally, mini-lectures introducing students to the techniques of solving complex project problems will be organized.

Block 3 (online): September 27-28, 2021

In this part, students will finish the design task and prepare for the final presentations. The tutors will support the teams in the process of preparing the final presentations. On the last day, there will be final presentations and a summary of the Summer School. After the end of the Summer School, students will have to prepare a report on the project in the form of a mini website. There will be a period of 3 weeks for the preparation of the report.
